

If you are looking for a job in or around a big city or metropolitan area, you may have heard from recruiters that the job market in that area is "saturated". THIS IS NOT TRUE!

Recruiters only have access to 10% of the jobs in the country, so their perspective is limited by their ability to place physicians primarily in rural areas. The Doctor Job works with physicians, residents, and fellows to help them find jobs in the big cities and metropolitan areas where they actually want to work.

You tell us your specialty and geographic area. We will come up with a list of every single practice, employer, and physician hiring and networking contact meeting your specifications. By reaching EVERY employer and contact in that market with a CV, you will, automatically, find EVERY job.

This means getting up to 40 or 50 interviews in one city! This gives you more negotiating power and the ability to find the highest paying job with the best environment for you!

The employers never know that The Doctor Job is working on your behalf, and this allows us to reach the 90% of the employers who REFUSE to work with recruiters! We do charge a fee, to you, that can range between \$1800-\$3700, but we GUARANTEE THAT YOU WILL FIND A JOB OR GET A FULL REFUND! And with almost a 100% success rate, we know our clients will do well.

We'd like to discuss your job search with you and give you a price quote for our services. There is no obligation, and even if you decide not to use our services, you may get some good career advice and counseling from the conversation. Please give us a call at 1-800-591-4842, if you are looking for a job and don't want to settle for what recruiters have offered you.

You will find a great job, WHERE you want. We guarantee it!
